*Rogue River-Siskiyou National Forest Outreach*
“Caring for the Land and Serving the People”
**About the Rogue River-Siskiyou National Forest**

The Rogue River-Siskiyou National Forest covers 1.8 million acres in southwest Oregon and northwestern California, primarily in the watershed of the Rogue River. It encompasses parts of the Cascade Mountains, Siskiyou Mountains, and Oregon Coast Range. The Forest is recognized for its biological diversity, scenery, and outdoor recreation opportunities.

Located in southwest Oregon, along the California/Oregon state line and bordering the Klamath National Forest to the south, the Fremont-Winema Forest to the east and the Umpqua National Forest to the north, the Rogue River-Siskiyou National Forest ranges from the crest of the Cascade Mountains west to the Siskiyou Mountains and nearly to the Pacific Ocean. The Rogue River-Siskiyou National Forest covers almost 1.8 million acres and is unique in its botanical diversity, largely due to the bisection of the South Cascades and Siskiyou Mountain Ranges.

The Forest is also home to an incredible abundance of Wild and Scenic Rivers (over 200 designated miles among the Rogue, Chetco, Illinois, Elk and Smith Rivers), 7 wilderness areas (350,000 acres), outstanding fisheries and wildlife resources and ruggedly breathtaking landscapes of mountains, rivers and lakes with occasional meadows.

The Rogue River National Forest (until 1932 called the Crater National Forest) was established by President Theodore Roosevelt in 1908. The name Rogue River commemorates the Takelma Indians, whose defense of their homeland let early day French-Canadian trappers to call them les Coquins, "the Rogues". The Siskiyou Forest Reserve was established by President Theodore Roosevelt in 1905, and the Reserve was designated as the Siskiyou National Forest in 1907. The name Siskiyou is a Cree Indian word for bob-tailed horse (bestowed in 1828 by French Canadians working for the Hudson Bay Company).

The Forest itself is composed of two distinct geological provinces: The Cascade Range and the Siskiyou Mountains. The Cascade Range is dominated by snowcapped volcanic peaks such as 9,495 foot Mt. McLoughlin located within the Sky Lakes Wilderness on the High Cascades Ranger District. The Siskiyou area embodies the most complex soils, geology, landscape, and plant communities in the Pacific Northwest. World-class wild rivers, biological diversity, remarkable fisheries resources, and complex watersheds define the Siskiyou. The Rogue River-Siskiyou is the most floristically diverse National Forest in the country with some extraordinary botanical resources. The unique character of the landscape has led to the designation of over 340,000 acres of the Forest as wilderness, and over 200 miles of streams as National Wild and Scenic Rivers. Wilderness areas managed all or in part by the Forest include: Sky Lakes, Rogue-Umpqua Divide, Red Buttes, Kalmiopsis, Siskiyou, Wild Rogue, Grassy Knob and Copper Salmon. National Wild and Scenic Rivers include: Upper Rogue, Illinois, North Fork Smith, Chetco, Elk, and Rogue.

The Forest Supervisors office is co-located with the Medford District of the Bureau of Land Management in Medford, OR and is adjacent to the Rogue Valley International Airport. The forest administers five ranger districts. On the west side of the forest, the Gold Beach Ranger District office is located in Gold Beach and the Powers Ranger District office is in Powers. On the east
side of the forest, the Ashland Ranger District office is located in the community of Star in the Applegate Valley; the High Cascades Ranger District office is co-located in Prospect and Butte Falls; and the Wild Rivers Ranger District is co-located in Cave Junction and in Grants Pass at the Grants Pass Interagency Office.

The forest leadership team manages a large and complex resource management program, including over 2 million recreation visitors per year, 30 to 40 MMBF of timber harvest per year and a significant wildlife and fisheries programs recognized for collaborative aquatic restoration projects. Several volunteers and partners associated with forest collaborative and restoration work have received national and regional recognition for their efforts. Natural resource management interest is high in the local and diverse rural and urban communities, representing opposing ends of the socio-political spectrum, from environmental advocacy groups to historically active mining communities.

The large natural resource program requires an extensive forest infrastructure, consisting of approximately 5,500 miles of roads, 133 road bridges, over 1,500 miles of trails, 326 developed recreation sites including the Mount Ashland Ski Area, 9 major administrative sites, including the Medford Air Tanker Base, the Siskiyou Rappel Base, and the J. Herbert Stone Nursery, one of the largest nurseries in the nation.
