Green Diamond Resource Company is a fifth-generation, family-owned forest products company. With headquarters in Seattle, we own and manage forests in California, Washington and Oregon. We manage our lands in an environmentally responsible manner (FSC and SFI certified), as sustainable and productive working forests. Our subsidiary, Green Diamond Management Company, manages forests in Alabama, Arkansas, Florida, Mississippi, Georgia, and South Carolina.

We support our employees in many ways - with safety practices and work environments beyond what the regulations require. We also invest in resources and education that offer our people an opportunity for growth and advancement.
