Position: Aquatic Biologist - Hydrology

The main objective for this position is to conduct watershed monitoring and assessment in conjunction with Green Diamond's Aquatic Habitat Conservation Plant (AHCP). The successful candidate will maintain proper operation of automated monitoring equipment and frequently resolve routine issues and problems as they arise. This job has a progressive career path which gives a unique set of essential functions at each level so as to establish proficiency in the discipline and allows career growth.

ESSENTIAL FUNCTIONS:

- Collects stream discharge measurements, sediment samples, and water samples for suspended sediment and turbidity monitoring.
- Conducts analysis of water samples in the laboratory.
- Conducts physical inventories of headwater streams measuring channel dimensions and sediment production.
- Utilize maps, aerial photographs, GPS and GIS to navigate and record spatial information.
- Enter field data in hand-held data collection devices and in a variety of databases.
- Maintains legible, accurate notes.
- Ensures proper care, upkeep, and maintenance of personal and group assigned equipment.
- Assists in other aspects of fisheries and herpetology monitoring projects as needed.
- Actively participate in the Company safety program.

KNOWLEDGE, SKILLS AND ABILITIES REQUIRED:

- Bachelor's degree in hydrology, geology, watershed management, or related program.
- Valid California driver's license.
- Must be able to successfully pass a qualifying course in ATV training.
- Ability to work alone or in small groups without immediate supervision.
- Demonstrate safe work habits.
- Ability to work overtime as necessary.

Benefits include: Competitive wages based on experience and qualifications, bonus plan, vacation, paid holidays, health benefits package, 401k and a company vehicle for business use.
