

California Division
PO Box 68
Korbel, California 95550

August 2, 2022

Position: Forester

This position works closely with and provides high quality field assistance to the Registered Professional Forester (RPF's). This important work supports the Company's business goal of maintaining a sustainable harvest of timber from managed forestlands. Conducting high quality field work for Timber Harvest Plan (THP) layout and engineering is a fundamental part of meeting Company objectives. This is a challenging position that leads to the development of a professional career path destined to become a registered professional forester licensed in the state of California.

ESSENTIAL FUNCTIONS:

- Flags boundaries, stream protection zones, property lines, wildlife retention areas, wildlife key habitat features (green trees, snags, ponds, seeps etc.), tree marking, and stream classification.
- Aids in the reconnaissance of new larger stands of timber for the eventual future development of roads and harvest areas.
- Documents and records the technical information related to each THP in a concise and accurate manner.
- Interacts daily with RPF's as well as other employees within the department. The incumbent will be working not only with these department representatives but also with other departments such as Operations, Silviculture and Conservation Planning.
- Provides informational documentation and explanation of details in regard to field layout.
- Represents the THP on Pre-harvest inspections and active inspections on an as needed basis.
- Assists the Silviculture department in miscellaneous forestry functions – burning, planting etc., as needed.
- Participates actively in Company safety program.
- May be assigned to other forestry-associated tasks as needed; these tasks may include but are not limited to prescribed burning, wildlife or stream assessment projects, and contract logging administration under RPF guidance.

KNOWLEDGE, SKILLS AND ABILITIES REQUIRED:

- Successfully completed college surveying or forestry courses such as measurements, dendrology, forest road layout and design, and logging systems.
- The ability to navigate through rough topography with the aid of map, compass and/or GPS. Learn and become proficient in the use of forest engineering equipment.
- Must have excellent observational skills and demonstrated ability to gather precise data.
- Must be able to take responsibility for the quality of his/her work products as well as his/her own personal safety.
- Proficient computer skills in Microsoft Office or similar programs.
- Must have a valid driver's license.
- Must be able to successfully pass a qualifying course in ATV training.
- Must be able to safely use a chainsaw and hand tools to clear brush.

Benefits include: Competitive wages based on experience and qualifications, bonus plan, vacation, paid holidays, health benefits package, 401k and a company vehicle for business use.
