Job Announcement
Project Manager
November 2021

What We Do

Resilient Forestry works in all aspects of forestry, forest science, and forest management, specializing in ecological forest restoration. We are based in Seattle and work across the Pacific Northwest (PNW) with small and large public and private landowners on a range of projects.

What We Are Looking For

We are looking for an experienced forest ecologist who can work closely with clients to identify, plan, and execute projects. These projects are holistic in nature and may include management of personnel and data, field inventory and measurement, literature review, geospatial data analysis, statistical modeling, report writing, and presentation of results. Opportunities to write proposals and estimate budgets for new projects, and be part of all aspects of our small company. This is a full-time permanent position. Scheduling is flexible and office work will be carried out remotely; occasional field work requires residence in the PNW. $45,000 - $60,000 depending on experience. Healthcare and retirement programs. The deadline for applications is January 15, 2022.

Qualifications

- Master of Forest Resources or Master of Science preferred (BS/BA accepted)
- Knowledge of principles of ecological forestry and PNW forested ecosystems
- Forestry operations knowledge preferred
- 2+ years experience in field data collection, analysis, and technical report writing
- Proficiency with GIS and spatial analysis
- Excellent written and oral communication skills
- Ability to work autonomously and remotely managing simultaneous projects
- Experience working directly with clients preferred
- Experience leading teams to complete projects
- Positive attitude and ability to actively foster an inclusive work environment
- Access to computer and cell phone sufficient for work purposes
- Valid driver's license and access to a vehicle capable of driving on primitive roads
