

Land Surveyor

Positions Available

Are you looking for a career that is fast paced, outdoors and provides an opportunity to become a professional in a field that is in high demand?

Does a career that will reward you with a sense of accomplishment that is visible to others and provide you with opportunities to apply your skills anywhere in the world sound interesting?

Ever wonder how accurate maps are made? How is it possible to depict every bend of a river, the elevation of every mountain top, the location of every road on a map? That is the work of a Land Surveyor. If you find using the combination of technology and history to find presumably lost treasures, then Land Surveying might be for you. If working in some of the most beautiful and remote places in Washington and Oregon sounds exciting, then Land Surveying might be for you. If a career that provides you with the opportunity to grow professionally while working in a team environment committed to your future, then Land Surveying may be for you.

We are presently looking for career minded, hardworking individuals with a passion for both learning and the outdoors, to join the land surveying profession.

Full time permanent and full time temporary (paid internship) positions are available.

Company Introduction

Schinnell Surveying and Mapping, PLLC (SSM), located in Centralia, Washington, offers professional land surveying, mapping, and drafting services to Western Washington and Northwest Oregon. Although our client base is multi-faceted, our emphasis has always been on timberlands and cadastral surveys. Our passion lies with surveying in the wide-open spaces and remote environments associated with industrial and public timberlands. The absence of car horns, sirens, smog, and traffic jams tends to create a much less stressful and more enjoyable work environment for our employees. Over the past 20 years, SSM has provided services to the majority of large industrial timberland owners in SW Washington, in addition to public agencies such as the United States Forest Service and the Oregon Department of Forestry. At the present time, we serve clients covering an area of over 1 million acres of privately held timberlands.

Educational Qualifications

Although this is an entry level position, qualified applicants having some post-secondary education, or who are in pursuit of an AA, AS, or BS degree associated with forestry, resource management, GIS, geology, archeology, historical and cultural resources, or other earth sciences are encouraged to apply. Often, applicants with these types of educational backgrounds find land surveying to be a satisfying and rewarding lifelong career that leads to professional licensure as a Registered Professional Land Surveyor.

Other Qualifications

- Possess reliable transportation along with a valid driver's license.
- In good physical condition. Work is performed outdoors during year-round weather conditions in locations ranging from urban to extremely remote settings. Individuals must be prepared to adapt quickly from one extreme to the other.

Benefits

Schinnell Surveying and Mapping offers competitive wages together with a benefits package that includes paid time off, holidays, medical insurance, 401k retirement and profit sharing.

Application Requirements

- Submit a resume along with a letter of interest describing your experience and qualifications.
- Provide a minimum of two professional references.
 - Email to: office@surveyingandmapping.com or if you prefer,
 - Mail to: Schinnell Surveying and Mapping, PO Box 1614, Centralia, WA 98531.
- Interested applicants are encouraged to contact us at 360-736-0394 for additional information or questions.
