<u>Dr. Elizabeth Koebele</u> at the University of Nevada Reno (UNR) is seeking a graduate student research assistant (GRA), beginning in Fall 2020, to work on an interdisciplinary, collaborative project about sustainable urban water management in the United States. The project is funded by the National Science Foundation's Dynamics of Integrated Socio-Environmental Systems program (award <u>1923880</u>). GRA duties include the collection, analysis, and synthesis of qualitative and quantitative social science data (interviews, media, etc.) related to water management.

This 20-hour/week, 12-month assistantship is available to a student pursuing either an MA or PhD in UNR's <u>Political Science Department</u>, preferably within the sub-field of public policy. Qualified students interested in pursuing an MS/PhD in UNR's <u>Graduate Program in Hydrologic Sciences</u> or <u>Environmental Sciences Graduate Program</u> will also be considered. A prior degree or work experience in environmental policy, environmental studies, water resources management, or a related field is preferred. The assistantship includes a competitive stipend, tuition for 9 credits/semester, and health insurance. It is renewable for 1 additional year (2 years total) contingent on satisfactory progress in the GRA position and toward the chosen degree.

More details and instructions for applying are available at <u>ekoebele.weebly.com</u>. Please share with your networks!
