WHAT IS A FORESTRY TECHNICIAN?

Forestry aids and technicians work in a variety of natural resource and recreation areas:

- Timber
- Wildlife
- Watershed
- Botany
- Silviculture
- Recreation
- Range
- And more!

Possible duties:

- Surveying the ecosystem
- Implementing restorative and protective projects
- Managing the growth of different types of trees and other vegetation
- Building and maintaining trails
- Recruiting and training volunteers
- Working with the public

Impact:

- Reduces the threat of wildfire
- Lessens tree disease
- Decreases the spread of invasive plant species
- Increases access and recreation opportunities
- Improves habitat for wildlife including threatened and endangered species
- Helps improve visitors' experience
